Address: [REDACTED]

Website: [www.pedersenmetaldesign.com](http://www.pedersenmetaldesign.com)

**Personal Statement** Sculptors James and Ryan Pedersen are a father/son collaborative team who create welded constructions in relief and free standing form. The combinations of steel, brass, and copper are used in most designs. The earthy colors and textures are achieved through welding, cutting, grinding and heat-treating these materials.

The finished artwork illustrates their combined passion for the outdoor environment as an artistic selection of these elements with a stylized approach that is related to various interpretations of the modern landscape.

### Sculpture

#### Title: Ebb and Flow

**Description:** Captured in sleek arcs, mirroring an almost wave-like form of currents and tides. Their twisted figural design captures a timeless flow, embodying rhythm and fluidity, as if each figure is a wave moving in unison, evoking a sense of harmony with the elements.

**Dimensions:** Dimensions: 72" x 42" x 36" Base: 36" x 36"

#### Weight:

**Materials:** Steel and Brass

**Installation Requirements:**

**Selling Price:** \$4,295
