Address: [REDACTED]

Website: [www.pedersenmetaldesign.com](http://www.pedersenmetaldesign.com)

**Personal Statement** Sculptors James and Ryan Pedersen are a father/son collaborative team who create welded constructions in relief and free standing form. The combinations of steel, brass, and copper are used in most designs. The earthy colors and textures are achieved through welding, cutting, grinding and heat-treating these materials. The finished artwork illustrates their combined passion for the outdoor environment as an artistic selection of these elements with a stylized approach that is related to various interpretations of the modern landscape.

### Sculpture

#### Title: Forged in the Field

**Description:** This design was Inspired from repurposed farm machinery parts to symbolize the deep connection between agriculture and industrial processes. The intertwined metal forms fan out like branching roots and the troughs of molten metal to show the resilience of both the land and the hands that have worked it, forging a timeless link between past and present.

#### Dimensions:

Dimensions: 52" x 28" x 6"

Base: 48" x 24" x 24"

Base Footprint: 12" x 12"

Total Height 100" x 24" x 24"

#### Weight:

**Materials:** Welded Steel

#### Installation Requirements:

**Selling Price:** \$7,795
